New Fournier BP

DESIGNER: FRANÇOIS RAPPO

24 STYLES: 2 WEIGHTS WITH ITALICS, EACH COMES WITH 3 SPECIFIC SIZES AND 2 X-HEIGHTS

PUBLISHED IN 2011

BOTH DIGITAL AND CONTEMPORARY

New Fournier BP is a contemporary translation of the equilibrium and elegance we find in the typography of Pierre-Simon Fournier. It possesses a particular dynamism and variety due to its pretension to rediscover the graphic style of 18th century France in a form that is both digital and contemporary – in some sense, the same style proposed by books in which the epigraph suggests: "the mother prescribe the book be read by her daughter".

In the spirit of Fournier's 'programme', New Fournier BP has been developed into a very large family that includes three different designs corresponding to three specific sizes for the font's use: **book**, adapted to continuous text and optimised for comfort while reading; **big**, optimised for continuous text but comprising a more historic and detailed design; and **headline**, in which the contrasts, graphic expression and details of the design have been optimised for composing titles.

These three designs are further divided into two x-heights: **New Fournier BP**, with a normal x-height, and **New Fournier BP Large**, which has a high x-height. The two groups are complementary.

Because of its variety, New Fournier BP covers a large range of typographic needs. Its italic and display cuts allow the designer to fully develop the graphic and visual potential of the font.
