Chalet Book

Third Party Font Management Software
If you're using Mac OSX Panther's "FontBook" or a third party font management utility, it would be best if you follow their instructions.

Macintosh OSX Instructions
Double click on the Installer Icon and follow the prompts. This will copy the fonts onto your hard drive. Simply copy the fonts to the "Fonts" folder inside your "Library" folder. If you want your fonts to be available to applications running in "Classic" mode, copy install your fonts in the OS 9.1 System folder in the "Fonts" folder. Fonts installed in the OS 9.1 System folder will also be available in OSX in classic applications.

Macintosh 8.0-9.2.2 Instructions
Double click on the installer Icon and follow the prompts. This will copy the fonts onto your hard drive. Make sure you don't have any applications open and that your System Folder is closed. Drag the fonts you wish to install and drop them on top of your System Folder. Your Mac will tell you that it would like to put these in certain places; click on OK. The Macintosh System stores all of your font files in a folder called "Fonts" inside your System Folder.

Windows TrueType Instructions
Double click on the installer Icon and follow the prompts. TrueType fonts will automatically be installed.

Windows 9x, ME OpenType Instructions
Double click on the installer Icon and follow the prompts. This will copy the fonts onto your hard drive. You must be running Adobe Type Manager on your system for your fonts to work. Please see the note above on Adobe Type Manager.

Windows 2000 and up OpenType Instructions
Double click on the installer Icon and follow the prompts. This will copy the fonts onto your hard drive (you can specify where you want the installer to put your fonts). Double click on the "Main" icon, then double click on the "Control Panel" icon. Find the "Fonts" icon and double click on it. In the "Fonts" window, go to the "File" menu and select "Install New Font." In the "Drive" window, find the disk and directory that holds your fonts. Your fonts will appear in the "List of Fonts" menu. Click on the font names you wish to install, then click on OK.

OpenType Comments
OpenType fonts will work with Macintosh OS 8.1 and above with Adobe Type Manager 4.6 or higher. They will work with Microsoft Windows 95 or higher with Adobe Type Manager 4.1 or higher. The OpenType font files are cross-platform compatible—you can use them on a Macintosh or PC.

Adobe Type Manager/OS 9.22, Windows 98 & 95
For your fonts to work correctly in OS 9.22 and lower or Windows 98 and lower, you must be using Adobe Type Manager version 4.6 or above on the Macintosh and version 4.1 or above on the PC. The Macintosh or PC version of Adobe Type Manager can be downloaded for free at:
Adobe Type Manager for Macintosh: http://www.adobe.com/support/downloads/atmmac.htm
Adobe Type Manager for Windows: http://www.adobe.com/support/downloads/atmwin.htm

Additional Support
Additional technical support is available at http://www.houseindustries.com or by calling 302-234-2356.

Chalet Book

OpenType Features

OpenType fonts are cross-platform-compatible, which means you can use them on your Macintosh or PC. These fonts also have extensive features that are only accessible if you are using OpenType-savvy applications, although they will work with any application in Windows 2000 and up and Macintosh OS 9.1 and up. At the time of creation of this manual, the only true OpenType-savvy design applications are Adobe InDesign 1.5 and up and Adobe Photoshop 6.0 and Adobe Illustrator 11 and up.

Automatic Small Caps

If you specify "Small Caps", InDesign and Photoshop will automatically substitute the true small caps characters as well as the corresponding figures and punctuation for any *lowercase* characters.
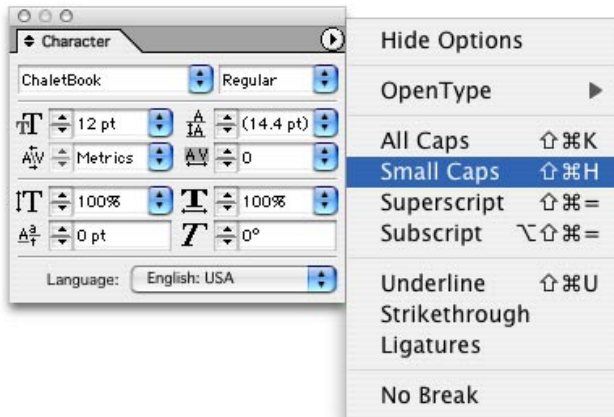

Caps to Small Caps

This feature changes all characters, figures and corresponding punctuation to true small caps.

OpenType Fonts
Includes four fonts. Its features may be accessed through any OpenType-Savvy application.

All Caps

This feature is simple…it just substitutes caps for any lowercase characters. It does some other handy stuff, though, like substituting "lining" figures for old style figures and "shifting" some punctuation up.

Fractions

Builds fractions from optimized numerators and denominators. Just type a number, slash and another number, select the text and apply the "Fractions" feature.
